GRP grit bins

SBA - 110, 220, 400, 420, 550, 750, 1100

Grit bins are designed for storage of spreading material (sand, gravel, salt). They can be effectively located on frequented and in winter risky spots such as pavements, bus stops, housing areas, bridges, filling stations, schools, shopping centres etc.

They are made of fibreglass highly resistant to mechanical, weather and chemical influences (easy graffiti removal). On customer request we laminate coloured logos, inscriptions, numbers, etc. into the surface of the grit bin. 5-year warranty period.

Specification:

- made of fibreglass,
- hinges from stainless steel,
- other parts hot-dip galvanized,
- various colours of the RAL scale, yellow standard colour.

Main advantages:

- long lifetime,
- high shape stability,
- UV resistant,
- at disuse stackable (at SBA 400 with lid closed too),
- aesthetic design,
- easy graffiti cleaning.

Options:

- anti-theft anchor,
- lid with the padlock,
- skids for forklifts,
- without emptying opening.

SBA 110 with/without emptying opening.

Polyethylene grit bins

ARROW - 200, 400

Grit bins are made of polyethylene highly resistant to mechanical, weather and chemical influences. Their design allows an excellent stacking and easy handling by forklift. Warranty period 2 years.

Specification:

- made of polyethylene,
- no corrosion, UV resistant,
- different colour versions (lid/container): orange/grey, yellow/grey, green/grey, yellow/yellow.

Main advantages:

- robust design including the lid ensuring long service life,
- easily transported by forklift or pallet truck,
- easily stackable,
- unique design.
