... snow will not surprise you

Grit bins are used for storing gritting material (e.g. sand, gravel, salt). The bins are suitable at busy places, which can be risky in the winter, i. e. at stops, housing estates, bridges, petrol stations, schools, shopping centres, and the like. They are made of polyethylene and are highly resistant against mechanical, weather and chemical impacts.

Specification

- made of polyethylene
- no corrosion, UV resistant,
- different colour versions (lid/container):
orange/ grey, yellow/ grey,
green/ grey, yellow/ yellow.

Main advantages

- robust design including the lid, guarantees long service life
- easily transported using a forklift or pallet truck
- well stackable
- unique design.

Type	Volume (l)	Size (l×w×h in mm)
Arrow 200	200	800×800×855
Arrow 400	400	1200×800×855
